

1. Company Overview

1.1 Company Introduction

Overview

Mobiloitte is a premier software development company specializing in Artificial Intelligence (AI), Blockchain, Internet of Things (IoT), and Mobile Application Development. Mobiloitte delivers digital transformation solutions to enterprises, startups, and government entities globally, focusing on security, scalability, and cutting-edge technology integration.

Key Points

- Founded to provide early-adopter advantages in emerging technologies.
- Specializes in AI, Web3, Blockchain, and IoT.
- Serves a global client base spanning multiple continents.
- Operates distinct delivery centers to maintain round-the-clock development.

Company Identity Details

- **Company Name:** Mobiloitte
- **Primary Industry:** Information Technology & Services
- **Core Focus:** AI, Blockchain, Mobile, Digital Transformation
- **Global Presence:** India, USA, UK, Singapore

1.2 Mission, Vision, and Values

Overview

Mobiloitte operates on a foundation of continuous innovation. The company's mission is to empower businesses worldwide by providing scalable, secure, and innovative technology solutions. The vision is to be the leading global partner for emerging technologies, ensuring clients stay ahead of digital curves.

Key Points

- **Mission:** Empower clients through next-generation tech solutions.
- **Vision:** Global leadership in AI, Blockchain, and IoT services.
- **Core Values:** Innovation, Integrity, Quality, Client Success.

2. Company History

2.1 Founding Story and Timeline

Overview

Mobiloitte was established to bridge the gap between traditional IT services and emerging technologies. Early in its lifecycle, the company pivoted aggressively into mobile application development, followed by deep investments in Blockchain, AI, and IoT as those technologies matured.

Timeline Highlights

- **Early Years:** Established as a mobile and web development agency.
- **Expansion Phase:** Opened international offices in US, UK, and Singapore.
- **Emerging Tech Era:** Launched dedicated Blockchain, IoT, and AI development labs.
- **Current Focus:** Enterprise digital transformation, Web3, and Generative AI.

3. Leadership Team

3.1 Executive Leadership

Overview

The leadership team at Mobiloitte consists of seasoned technology executives and business leaders who guide the company's strategic vision. Jagdish Harsh serves as the Founder & CEO, driving the company's expansion into Blockchain and AI globally.

Leadership Details

- **Founder & CEO:** Jagdish Harsh — Global strategy, company vision, major client acquisitions.
- **Directors / VPs:** Not publicly disclosed — Departmental oversight, regional operations.
- **Delivery Heads:** Not publicly disclosed — Ensuring project quality and SDLC compliance.

4. Organization Structure

4.1 Departments and Business Units

Overview

Mobiloitte is structured into specialized business units to ensure domain expertise. Each department operates semi-autonomously under agile frameworks, reporting to regional delivery heads.

Key Departments

- AI & Machine Learning Lab
- Blockchain & Web3 Division
- Mobile App Development
- Cloud & DevOps Engineering
- Quality Assurance (QA)
- Human Resources (HR) & Operations

5. Office Locations

5.1 Global Delivery Centers

Overview

Mobiloitte operates a global delivery model with headquarters and major development centers in India, supported by strategic international offices in North America, Europe, and Asia.

Location Details

- **India (HQ & Delivery):** New Delhi (Okhla) — Primary Development Center, Operations.
- **India (Delivery):** Pune, Maharashtra — Technical Development Hub.
- **North America:** USA (Boston area) — Client Relations, Sales, Consulting.
- **Europe:** United Kingdom — European Sales and Consulting.
- **Asia-Pacific:** Singapore — APAC Client Relations and Strategy.

6. Office Timing & 7. HR Policies

6.1 Workplace Guidelines

Overview

Mobiloitte maintains standard corporate working hours aligned with global delivery requirements. Specific leave, attendance, and remote work policies are governed by internal HR compliance and local labor laws.

Policy Status Details

- **Working Hours:** Generally standard IST business hours for India teams; shift-based for global support.
- **Remote Work:** Role-dependent; governed by internal hybrid work rules.
- **Leave Policy:** Includes Casual, Sick, and Earned leaves.
- **Benefits:** Health insurance, performance bonuses.

8. Recruitment Process & 9. Careers

8.1 Hiring Workflow

Overview

Mobiloitte recruits top engineering and management talent through a rigorous multi-stage interview process. The company hires for both fresher roles (through campus placements) and lateral experienced roles.

Standard Hiring Steps

- **1. Screening:** Resume parsing and initial HR screening call.
- **2. Technical Round 1:** Core technology evaluation and coding assessment.
- **3. Technical Round 2:** System design, architecture, or advanced domain knowledge.
- **4. Managerial/HR Round:** Culture fit, salary negotiation, and final offer.

10. Company Services

10.1 AI & Generative AI Development

Overview

Mobiloitte provides end-to-end Artificial Intelligence solutions, focusing on machine learning models, natural language processing (NLP), and Generative AI to automate business operations and enhance decision-making.

Service Details

- **Technologies:** LLMs (GPT, Llama), RAG, LangChain, Python, TensorFlow.
- **Use Cases:** Custom chatbots, automated document analysis, predictive analytics.
- **Benefits:** Reduces manual operational costs, increases data processing speed.

10.2 Blockchain & Web3 Development

Overview

Mobiloitte is a recognized leader in Blockchain technology, developing decentralized applications (dApps), smart contracts, crypto exchanges, and NFT marketplaces for global clients.

Service Details

- **Technologies:** Ethereum, Solana, Hyperledger, Polygon, Rust, Solidity.
- **Use Cases:** Supply chain tracking, decentralized finance (DeFi), tokenization.
- **Benefits:** Immutable records, high security, removal of intermediaries.

11. Technologies

11.1 Core Technology Stack

Overview

Mobiloitte employs a modern, scalable technology stack across frontend, backend, cloud, and emerging tech verticals to ensure enterprise-grade software delivery.

Technology Categorization Details

- **Frontend:** React.js, Angular, Vue.js, HTML5, CSS3.
- **Mobile:** Flutter, React Native, Swift (iOS), Kotlin (Android).
- **Backend:** Node.js, Python, Java, .NET, Go.
- **Cloud & DevOps:** AWS, Azure, GCP, Docker, Kubernetes, Jenkins.
- **Emerging Tech:** Solidity, GenAI, RAG, IoT Protocols (MQTT).

12. Industry Expertise

12.1 Sectors Served

Overview

Mobiloitte delivers tailored technology solutions across a wide array of industries, adapting their AI, Blockchain, and Mobile capabilities to specific regulatory and business requirements.

Key Industries

- **Healthcare:** Telemedicine apps, HIPAA-compliant patient portals, IoT wearables.
- **Finance & Banking:** FinTech apps, secure payment gateways, DeFi platforms.
- **Logistics & Supply Chain:** Blockchain tracking, fleet management software.
- **Retail & E-commerce:** Omnichannel platforms, AI-driven recommendation engines.

17. Development Process

17.1 SDLC and Methodology

Overview

Mobiloitte follows industry-standard Software Development Life Cycle (SDLC) practices, primarily utilizing Agile and Scrum methodologies to ensure flexibility, transparency, and rapid delivery.

Development Phases Details

- **1. Discovery:** Requirement gathering, feasibility analysis, architecture planning.
- **2. Design:** UI/UX prototyping, database schema creation, system design.
- **3. Development:** Iterative coding via Agile sprints.
- **4. Testing:** Automated and manual QA, security auditing, UAT.
- **5. Deployment:** CI/CD pipelines, cloud deployment (AWS/Azure).

20. Security Standards

20.1 Compliance and Data Protection

Overview

Mobiloitte prioritizes data security and compliance across all development projects. The company adheres to global security frameworks to protect client data, source code, and end user privacy.

Key Security Practices

- **Data Encryption:** TLS/SSL for data in transit; AES-256 for data at rest.
- **Vulnerability Testing:** Regular OWASP Top 10 vulnerability scanning.
- **Compliance Alignment:** Development aligned with GDPR, HIPAA, and standard ISO principles.

24. Glossary & 26. Acronyms

24.1 Corporate and Technical Terminology

Overview

A reference for technical and internal terminology frequently utilized within Mobiloitte's documentation and client communications.

Glossary & Acronym Details

- **RAG (Retrieval-Augmented Generation):** "Mobiloitte built a RAG system for the client's PDF data."
- **LLM (Large Language Model):** "Integrating LLM APIs like OpenAI into customer support."
- **dApp (Decentralized Application):** "Developing a dApp on the Ethereum network."
- **CI/CD (Continuous Integration / Continuous Deployment):** "Setting up CI/CD pipelines in Azure DevOps."
- **SDLC (Software Development Life Cycle):** "Following the Agile SDLC for the mobile app."

29. Contact Directory

29.1 Official Contact Channels

Overview

Mobiloitte maintains centralized communication channels for sales, support, and general inquiries to ensure rapid response times and proper routing.

Contact Details

- **Sales & Business Inquiry:** Contact form via www.mobiloitte.com
- **Career Opportunities:** Careers section on official website
- **General Information:** Info email (as listed on official site)
